

Twenty-Four News Letters ...

New Trends

Today's busy manufacturing & processing organizations have adopted a new philosophy. The idea was being passed & practiced by manufacturing users of **MRP/II** (Manufacturing Resource Planning) was generally an "improvement program" that was not intended to solve any existing problems. It was only when the idea of solving existing problems became a reality that users started to pay attention to it. However, the idea was not intended to solve any existing problems. It was only when the idea of solving existing problems became a reality that users started to pay attention to it. However, the idea was not intended to solve any existing problems. It was only when the idea of solving existing problems became a reality that users started to pay attention to it.

"What a Long Strange Trip It's Been"

Four Forward ... **Manufacturing** ... The idea of **MRP/II** (Manufacturing Resource Planning) was generally an "improvement program" that was not intended to solve any existing problems. It was only when the idea of solving existing problems became a reality that users started to pay attention to it.

The idea was not intended to solve any existing problems. It was only when the idea of solving existing problems became a reality that users started to pay attention to it. However, the idea was not intended to solve any existing problems. It was only when the idea of solving existing problems became a reality that users started to pay attention to it.

The idea was not intended to solve any existing problems. It was only when the idea of solving existing problems became a reality that users started to pay attention to it. However, the idea was not intended to solve any existing problems. It was only when the idea of solving existing problems became a reality that users started to pay attention to it.

As the technology advanced, the idea of solving existing problems became a reality that users started to pay attention to it. However, the idea was not intended to solve any existing problems. It was only when the idea of solving existing problems became a reality that users started to pay attention to it.

New Century Brings New Technology

MRP/II ... **Manufacturing** ... The idea of solving existing problems became a reality that users started to pay attention to it. However, the idea was not intended to solve any existing problems. It was only when the idea of solving existing problems became a reality that users started to pay attention to it.

As the technology advanced, the idea of solving existing problems became a reality that users started to pay attention to it. However, the idea was not intended to solve any existing problems. It was only when the idea of solving existing problems became a reality that users started to pay attention to it.
